ADDITIONAL INFORMATION SUPPORTING njd (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite):

A Wetland Delineation was received on 2/5/2007 from Natural Resource Consulting for Corps concurrence and Jurisdictional Determination. After reviewing data sheets, topographic maps, USDA soil surveys, wetland inventory maps and aerial photographs the Corps has determined the wetland to be isolated. From the mapping provided, it is apparent that this once was a tributary to the Milwaukee River, however, the western extension of this historic waterway (on parcel 4) lacks characteristics of either a wetland or waterway (at best it may be considered an upland swale). This waterbody is therefore not subject to regulation by the Corps of Engineers.
